Who we are

Our team has deep, specialized expertise in large-scale federal grants and cooperative agreement management for public emergencies. We've guided some of the most complex disaster and emergency recovery efforts in modern times, driven by a mission to make communities whole and safe again. We bring our integrity and knowledge to deliver meaningful support to communities in need, helping them build local capability for long-term resilience. As we've done for numerous states and territories—including Florida, Louisiana, New Jersey, Texas, and Puerto Rico—we combine subject matter expertise with local staffing to expedite compliant programs that spur economic development and promote lasting recovery.

What we do—and how we do it differently

We provide comprehensive grant management support for a large and diverse portfolio of state and local grantees and their subgrantees and subrecipients. By helping local governments navigate and weave together multiple federal funding streams, we empower them to unleash the power of those funds to address the social and economic inequities that disasters—including the pandemic—expose.

We offer robust project management experience supporting federal, state, and local governments' grant management needs with capabilities that include:

Strategic communications
and marketing

Information
technology

Training and
technical assistance

Data analytics
and visualization

Human capital consulting

Cybersecurity

Workforce development

Our clients

ASPR TRACIE

Manage the day-to-day operations of HHS' healthcare system emergency preparedness TA center and information gateway. We've surged staff and responded to 500% more TA requests since COVID-19.

CDC Biosense

Support surveillance program by managing the technology platform, expanding the scale and scope, and improving the quality of the surveillance data—significantly enhanced for COVID-19.

H1N1 PHER grant reconciliation

Following the H1N1 pandemic, we evaluated the grant applications versus final budget and progress report data from the 62 Public Health Emergency Response cooperative agreement recipients.

Puerto Rico recovery

Manage the federal disaster recovery program in Puerto Rico following the devastating 2017 hurricane season. To date, our team has successfully processed more than \$2 billion in aid.

Texas disaster mitigation and recovery

Assist the Texas General Land Office in managing more than \$10.6 billion in CDBG-DR and CDBG-MIT funding. To-date we've overseen construction of more than 3,300+ completed homes, more than all other 2017 disaster recovery programs combined, and reconciled more than 25,000 expenditures, saving the State more than \$100,000 annually in late payment interest on invoices.

California CARES Act recovery

Provide grant administration as well as training and technical assistance to implement programs to prevent and eliminate homelessness exacerbated by the COVID-19 pandemic.
